# Invacare Pegasus

10 kph 4 wheel

The Pegasus is mid-sized mobility scooter designed for good outdoor performance without sacrificing indoor manoeuvrability. The powerful 10kph motors get you from home to the shopping centre with ease and the good turning circle enables you to negotiate the shops once there.

## Positioning & Comfort

- ✎ Seats: ergonomically shaped seats with soft padding; recliner lever; and height adjustability – provide optimum comfort and positioning
- ✎ Tiller: ergonomic handlebars, intuitive key pad for comfort & ease of use
- ✎ Chassis: front & rear suspension on both models for a comfortable ride

## Safety

- ✎ Automatic speed reduction on bends reducing risk of falls/tipping
- ✎ Speed reduction button provides a quick way to halve current speed at the simple touch of a button – handy in crowded areas
- ✎ Handbrake assists the user to stop more suddenly if necessary
- ✎ Brake light with delay warns those behind that the scooter is stopping reducing the risk of collisions
- ✎ Tie-down points to prevent the scooter from moving around when being transported

**Overall width** 62.5 cm **Overall length** 129 cm

**Wheels front** 29cm/11"Pneumatic **Wheels rear** 29cm/11"Pneumatic

**Ground clearance** 9 cm

**Curb climbing** 8 cm

**Turning radius** 140 cm

**Chair weight (exc batteries)** 78 kg

**Chair weight limit** 136 kg

**Standard battery size (2)** 12V 50 Amp

**Standard battery charger** 24V/8 amp (off-board)

# Invacare Comet

15kph 4 Wheel

## Outdoor Power

The Comet is a larger Scooter designed for the outdoors and travelling greater distances. The Comet's powerful 15kph motor, large batteries (74amp standard) and a high ground clearance enables you to tackle demanding terrain with ease.

## Comfort

A comfortable driving experience reduces fatigue when travelling longer distances. This is why the Comet comes with an ergonomically shaped seat with soft padding and height adjustability, providing optimum comfort and positioning. In addition the easy to adjust ergonomic handlebars on the Comet prevents fatigue in the hands and arms.

## Visibility

✍ Brake light with delay warns pedestrians that the scooter is stopping reducing the risk of collisions.

✍ Your Comet will come with a free safety flag and high visibility vest so that you will be seen by drivers and pedestrians.

## Driving Control

✍ Automatic Speed Reduction (ASR) on bends reduces risk of falls or tipping.

✍ Speed reduction button provides a simple way to halve the speed of the Comet for negotiating busy areas like Supermarkets and Malls.

✍ Large wheels and independent suspension deliver a smooth and safe driving experience when tackling rough surfaces.

## Scooter Transportation

✍ Tie-down points to prevent the scooter from moving around improving safety during transport\*

\* Invacare recommends that, when a scooter is being transported in another vehicle, the user sit in the vehicle seat with his/her seatbelt on, NOT on the mobility scooter that is being transported.

**Overall width** 66 cm **Overall length** 148 cm **Overall height** 112 - 120 cm

**Wheels front** 31 cm/13" Pneumatic 2

**Wheels rear** 31 cm/13" Pneumatic 2

# Invacare Meteor

15kph 4 Wheel

The Invacare® Meteor provides you with complete freedom to enjoy total independent travelling. With emphasis on safety, user friendliness and unique driving capabilities this robust scooter enables you to overcome high obstacles, uneven surfaces and to climb steep slopes. The Invacare® Meteor possesses logical “easy access” controls and multiple adjustable features ensuring a comfortable and safe drive.

- ✍ Front and rear lighting system, including indicators and hazard lights
- ✍ Left and right rear vision mirrors
- ✍ Adjustable spring suspension on all 4 wheels
- ✍ Bright metallic paintwork. Smart stylish European design
- ✍ Revolving seat (height, forward, back). Seat reclines from 0 to 30°
- ✍ The unique tiller design is adjustable as well as ensuring controls are always in view
- ✍ Bumpers and scuff protectors guard your scooter from those little knocks and bumps
- ✍ Headlights operate independently of tiller ensuring street is always illuminated
- ✍ The longer operated control, rather is ideal for those with arthritis or limited hand function. It also increases the comfort over long trips.
- ✍ Easy to use braking system can be used as an extra safety feature when parking on slopes. Also allows you to shorten braking distance if needed
- ✍ Smooth, comfortable driving with a top speed of 15km/hr
- ✍ Range: Up to 50km
